When reviewing this document, please keep in mind that it only provides a “snapshot” of the service and ridership of the identified routes. This document is not meant to be an analysis piece, but rather a way to visualize and better understand some of the characteristics of these routes. I hope this data provides you and your organization with a more complete understanding of the fixed route transit that serves the Cherry Hill area.

From my perspective, the main “takeaways” of the data are as follows:

- Type and level of service for each route
- Quantity of weekday boardings for each route
- Spread of weekday boardings by time period
- Directionality and Quantity of weekday rider activity at stops nearest Cherry Hill

Average Ons and Offs at the stop pair nearest Cherry Hill – Routes 3,4,63,64,193,303

The majority of riders using the stop pair at E Jefferson and 18th Ave arrive on eastbound buses and leave on westbound buses. This is likely no surprise given the location of Cherry Hill and the design of transit service in the area, but it's something the data clearly illustrates.
